Summary

Computer Science undergraduate passionate about building user-centric products by combining technical expertise with product thinking. Experienced in AI/ML, user research, MVP definition, product roadmapping, and cross-functional collaboration through academic and hackathon projects. Seeking a Product Management internship to translate customer insights into scalable, data-driven product solutions.

Education

Madhav Institute of Technology and Science — Gwalior, India
Bachelor of Technology in Computer Science — *June 2024 – May 2028*

Delhi Public School — Gwalior, India
Senior Secondary School — *July 2022 – May 2024*

Product Management Experience

NavAI — AI-Powered Event Management Platform *Product Manager* — June 2026 – Present

- Conducted market research and user interviews to identify operational gaps in Navratri event discovery and management across Tier-2 cities.
- Defined product vision, user personas, MVP scope, and feature roadmap for an AI-enabled event platform.
- Prioritized AI-powered features including personalized recommendations, organizer analytics, and automated attendee support by balancing user value with engineering feasibility.
- Created PRDs, user journeys, wireframes, and collaborated with engineering and design teams to deliver a functional prototype.

Experience

Infosys Springboard — Oct 2025 – Jan 2026
AI Intern

- Designed and developed an AI-powered Emotion Detection and Music Recommendation System using Python, TensorFlow, and OpenCV.
- Built and evaluated deep learning models through data preprocessing and optimization.
- Developed a context-aware recommendation engine translating detected emotions into personalized playlists and documented experiments using Git/GitHub.

Technical Projects

ResearchPilot AI — Multi-Agent Research Assistant — Aug 2025 – Present
Python, LangGraph, Pinecone, FastAPI, OpenAI API

- Developed a multi-agent AI research assistant using Retrieval-Augmented Generation (RAG) for academic paper retrieval and comparison.
- Designed specialized agents for summarization, citation analysis, and discussion generation.
- Integrated Pinecone, arXiv APIs, and Langfuse for semantic retrieval, evaluation, and observability.

SwasthiyaLink — Smart Healthcare Dashboard — Jul 2025 – Present
Machine Learning, PaddleOCR

- Designed a healthcare dashboard to streamline doctor-patient interactions and digital health records.
- Integrated PaddleOCR for prescription and medical document digitization.
- Implemented machine learning models for predictive health analytics and patient risk assessment.

Skills

Product: User Research, Market Research, Product Strategy, MVP Scoping, Roadmapping, Wireframing, PRDs, Agile, Cross-functional Collaboration
Programming: Python, C/C++, JavaScript, SQL
Web: React, Node.js, HTML, CSS, Flask, FastAPI
AI/ML: TensorFlow, Keras, OpenCV, Scikit-learn, LangGraph, Pinecone
Tools: Git, GitHub

Achievements

- Top 4 finish in HackOrbit National Hackathon among 4,000+ participants.
- Selected among the Top 10 teams nationwide for the IIT Guwahati Hackathon.
- Solved 300+ Data Structures and Algorithms problems across coding platforms; earned a 5-star HackerRank rating.
- Selected to participate in the Raisina Dialogue and Indo-China Youth Dialogue.
